Profile

Senior SRE & Cloud Architect with 10+ years of experience designing, operating, and scaling highly available production systems across AWS and Kubernetes. Proven track record in reliability engineering, cloud architecture, incident response, observability, CI/CD, and performance optimization, including a 50% reduction in API latency and 40% reduction in infrastructure operating costs.

Combines hands-on production ownership with technical leadership across software engineering and infrastructure teams. Increasingly focused on AI-native software engineering and agentic coding workflows, including the creation of PitWay, an open-source CLI for evidence-driven AI-agent development workflows covering planning, execution, verification, and integration.

Certifications

- CKA: Certified Kubernetes Administrator , 11/2025, 11/2027
- AWS Certified Developer – Associate , 12/2024, 12/2027
- Google Cloud Certified Associate Cloud Engineer , 11/2024, 11/2027
- AWS Certified Cloud Practitioner , 12/2022, 12/2027
- Datadog: DPN Technical Specialist

Technical Skills

Cloud & Infrastructure: AWS (EC2, ECS, ECR, ALB, VPC, RDS, Lambda, ElastiCache, SNS, SQS), Google Cloud Platform (GCP), Kubernetes, Amazon EKS, Docker, Nginx, Terraform, CloudFormation, AWS SAM, Ansible, Shell Scripting

SRE & Observability: Datadog, New Relic, Prometheus, Grafana, AWS CloudWatch, Linux, Incident Response, Performance Engineering, Capacity Planning

CI/CD & Version Control: GitHub Actions, GitLab CI, CircleCI, AWS CodePipeline, AWS CodeDeploy, Git, GitHub, GitLab

Languages & Frameworks: Python, JavaScript, TypeScript, PHP, Node.js, Laravel, React.js, Vue.js, Nuxt.js

Databases & APIs: PostgreSQL, MySQL, MariaDB, DynamoDB, SQLite, RESTful APIs, GraphQL, Mobile API Architecture

Professional Experience

Onenex

SRE Team Lead & Cloud Solution Architect

Jul 2022 - Current

Myanmar (Remote)

- **Performance Optimization:** Reduced API latency by 50% and infrastructure operating costs by 40% through APM-driven backend/database optimization and cloud automation.
- **Incident Response & Reliability:** Directed production incident response for Pocket and HEAL (AWS EC2 Auto Scaling Groups, RDS Aurora MySQL), driving root-cause analysis across application, database, and infrastructure layers, and optimizing Pocket's performance with New Relic APM.
- **Cloud Architecture & Operations:** Architected highly available AWS infrastructure and mobile API platforms across multiple customer-facing applications, including AWS Managed Services and full infrastructure ownership for Yoma Group's environments (~4 years).
- **Observability & CI/CD:** Established CI/CD and observability pipelines using GitHub Actions, GitLab CI, Datadog, Prometheus, Grafana, New Relic, and AWS CloudWatch.
- **FinTech & Kubernetes Infrastructure:** Engineered a Kubernetes deployment pipeline (AWS EC2 Auto Scaling Groups, ArgoCD, Prometheus/Grafana) for 2C2P WAVE App's Thailand-to-Myanmar remittance platform, and architected a secure payment wallet platform on scalable microservices.
- **AI & Platform Engineering:** Spearheaded AI-driven SDLC adoption by creating PitWay, an open-source CLI for evidence-driven AI-agent development workflows, and independently designed and managed serverless infrastructure for Tikkat, an online ticketing platform.

Onenex

Development Team Lead & Solution Architect

Feb 2022 - Jul 2022

Myanmar (Hybrid)

- Led backend software engineering using Node.js and Laravel, refactoring a legacy monolithic HR management system to improve performance, maintainability, and stability.
- Bridged software development and SRE teams as primary technical liaison, aligning application architecture with infrastructure, deployment, and operational requirements.
- Engineered reusable internal libraries and software packages to accelerate delivery and enforce consistent engineering standards across projects.
- Mentored junior engineers through architecture reviews, code reviews, debugging, and engineering best practices.
- Strengthened CI/CD and deployment architecture to improve development-to-production workflows.

Super Seven Stars

Development Team Lead

Jul 2020 - Feb 2022

Myanmar (On site)

- Led engineering development and delivery for customer-facing e-commerce systems.
- Converted a traditional Magento e-commerce platform into a headless architecture using React, improving frontend flexibility, performance, and delivery speed.
- Designed and implemented auto-scaling infrastructure for Magento services, improving production reliability and reducing downtime.
- Led engineering practices including pull request reviews, CI/CD implementation, coding standards, and technical delivery.
- Collaborated directly with clients to translate complex business requirements into scalable and maintainable technical solutions.

NCDDP Myanmar

Web Developer and Data Management Officer

Jan 2016 - Jun 2020

Myanmar (On site)

- Designed and implemented an automated data pipeline consolidating 63 separate databases into a single source of truth, improving data consistency and reporting accuracy.
- Built and deployed a mobile data collection platform that streamlined field data gathering and reporting workflows.
- Integrated MIS systems with CI/CD pipelines to automate application deployments and implemented database schema versioning for consistent releases.
- Managed end-to-end database operations including performance troubleshooting, backup and restore automation, maintenance, and data integrity.
- Delivered technical support and knowledge sharing across development and operational teams.

Open-Source Contributions

PitWay

Creator & Maintainer

<https://github.com/thixpin/pitway>

Open-source CLI for evidence-driven software engineering workflows around AI coding agents — planning, execution, verification, and integration.

Agentic Coding Basic

Creator

<https://github.com/thixpin/agentic-coding-basic>

Practical foundation for agentic software development and structured AI-agent workflows.

Myanmar-UniPress

Creator & Maintainer

<https://github.com/thixpin/Myanmar-UniPress>

WordPress tool converting legacy Myanmar font-based content to Unicode on save.

Laranex

Contributor

<https://github.com/laranex>

Open-source Laravel ecosystem initiative building reusable packages.

Tech Content Contributions

CloudRider YouTube Channel (<https://www.youtube.com/@devTorque>)

- Produced technical content on AWS, DevOps, MLOps, and cloud automation, including the 100 Days of DevOps/MLOps series.

Technical Blog on Hashnode (<https://hashnode.com/@thixpin>)

- Authored technical writing on development, cloud infrastructure, and DevOps.

Community

AWS Myanmar Community

AWS Community Builder

- Contributed to the AWS community through technical knowledge sharing, cloud architecture discussions, and practical DevOps and infrastructure engineering content.

Myanmar Security Forum

Security Community Contributor

- Participated in the Myanmar security community through discussions and knowledge sharing around web application security and related engineering practices.

Myanmar Unicode Area

Co-founder / Community Contributor

- Co-founded and contributed open-source tooling to Myanmar Unicode adoption within the local developer community.

Education

Bachelor of Science (B.Sc.), Industrial Chemistry

Dec 2003 - Nov 2006

Year of graduation: Nov 2006

West Yangon University, Myanmar

Communication

- English (C1)
- Burmese (Native)
